What is Classroomscreen?

Hi! We are so glad you are here - welcome to Classroomscreen! We provide a variety of tools such as timers, a randomizer, and a noise level meter, that can be displayed on a digital screen to support teaching and learning. We call these tools widgets, and now have 25 different ones to assist you.

You can combine all the widgets you need to set clear expectations, collect feedback, support your time management, and much more! We believe that Classroomscreen can make teaching more effective and engaging in just a few clicks. You can set visual timers to keep activities on track and use noise level monitors to manage the classroom atmosphere.

Display instructions clearly with the text box, and make lessons interactive with the drawing tool and media embedding. Involve all students by using random name pickers and quickly gauge understanding with polls. Customizing backgrounds and themes also helps create an engaging and relevant learning environment.

Let's get you signed up...

Whilst you can always use Classroomscreen without signing up, there are so many reasons why you should! Just enter your email, set a password, and you are good to go.

✦ **Tip:** You can login with your Microsoft or Google credentials to save time.

We do offer a **Pro** subscription with a bunch of additional features including saving and organizing your screens, and explore more advanced functionalities. This Pro subscription also allows you to organize your screens into workspaces, so you can keep all your resources where you need them most.

If you are looking to purchase multiple licenses, make sure to check out our **Organization** option. This allows for an admin to assign a set number of licenses to teachers in the same school or district, saving you both time and money! Reach out to us for a quote.

✦ **Example:** Our Pro subscription allows us to not only keep Classroomscreen entirely ad-free, but also gives us the time to keep developing the app into the future!

Basic
Recommended for getting started

€0⁰⁰ per year

Free includes:

✓ All 25 widgets
✓ Annotation bar
✓ Remote poll voting
✓ Save three name lists
✓ Save your own widget bar layout
✓ Complete access to our template library

Pro
Recommended for teachers

€29⁹⁰ per year

All Free features, and:

✓ Save your screens
✓ Organize your screens in workspaces
✓ Save custom backgrounds
✓ Save up to 100 name lists
✓ Create custom widget themes
✓ Access to all Pro backgrounds
✓ Create custom background carousels

I believe everyone should sign up for the pro account because of the convenience and peace of mind. I can put time and effort into my screens and then, since it is all saved, it is so easy to tweak them for the week and access them on different computers.

Meet the widgets

Classroomscreen consists of widgets, or tools, that you can add to a personal screen. We now have 25 widgets; from timers to polls, stickers to QR codes, we have everything a teacher needs in their class management toolkit.

This is the widget bar. You will find it at the bottom of every single screen you create, and is where you will find all the widgets available.

Aa	**Text**
📅	**Calendar**
⧗	**Timer**
	Timetable
	Work symbols
	Randomizer
	Traffic light
	Sound level
	Group maker
	Poll
	QR Code
	Dice
	Scoreboard
▶	**Video**
◎	**Webcam**
	Visual timer
01:00	**Stopwatch**
	Hyperlink
	Embed
	Background
	Draw
🕐	**Clock**
	Event countdown

Your essentials

There are some widgets which we think are essential Classroomscreen tools, so we wanted to take this time to show them off to you in all their glory!

Clock

Where would any teacher be without the Clock? You'll see this widget on pretty much every screen made by our users. Time management an essential part of teaching, so make sure to pop this on your screen to help keep track of the time.

> ✦ **Tip:** Want to change from analogue to digital? Just shrink the widget using your cursor until it changes!
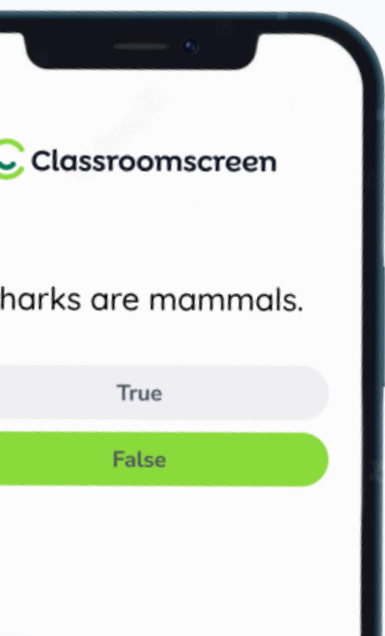

Backgrounds

Crisp, clear background images and patterns are a key benefit of Classroomscreen. Just click the background icon and select a picture, gradient or cute illustration to complete your screen. You can also add your own image or even build a slideshow!

Poll

Whether you are measuring student understanding, gathering opinions, or fostering interactive discussions, this free live polling tool empowers you to collect real-time responses. We have three different formats and even live, remote voting included for all users.

> ✦ **Example:** Add a poll widget to your screen, select the True/False format and type in the question 'Sharks are mammals". Your students can vote from their devices like so!

Top tips
from our community

My favorite widgets are the **text box** - to inform my students of what they need to accomplish during class time, the **timer** - to let my students know how much time they have left to accomplish their assignments, and the **group maker** - to easily place students in groups.

Kimberly
Teaches 4th grade

I always include a **clock**, **a timer with a fun sound**, and a **background image** that matches the theme of each lesson. I love Classroomscreen because I can easily create or use provided backgrounds to go with the theme of every lesson.

Debbie
Teaches STEAM in high schools

The **Randomizer** widget is a great feature to keep the student on their toes. It's fair and democratic and allows a different child to be selected at random each time for whatever chosen task the teacher has.

Richard
Teaches 2nd grade

The **Dice, Traffic light, Clock,** and **Calendar** widgets can be incorporated into students' daily routines. I use the stopwatch the most in practice. I think it is very supportive for my students to gain time management skills in daily life.

Say hi to your Dashboard!

Good organization is central to teaching, so when designing Classroomscreen, we prioritized storage! There is no limit on how many screens you can have as a Pro user, so knowing how to organize your screens effectively is super important.

Your Dashboard is where you can see all your screens and organize them according to your needs. You can access your dashboard by clicking on the 'Home' icon in the upper left-hand corner of your screen. You can also access your name lists, backgrounds and other important settings here.

Workspaces

Dashboard ❯ (workspaces) ❯ collections ❯ screens

You will see at least one workspace on the left side of the dashboard when using Classroomscreen with no account or a Basic account. If you have a Pro account, you can create additional workspaces.

Workspaces are often used to group screens according to subject or year group.

+ Add workspace

# Collections

Collections are a series of screens that can be flicked through. Also, if you choose to 'Pin' a widget, it will be visible in the same location on all screens within that collection.

There are many ways to use the collection, but a common way is to create one collection for each day and store all your screens for that day in the collection.

You can also give each collection a different color to help your organization, and move screens between collections by just dragging your mouse.

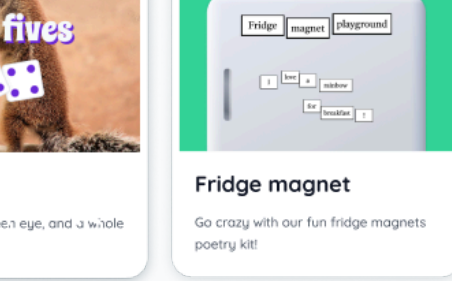

Screens

Screens form the basis of Classroomscreen - the clue is in the name! There are two ways to create a new screen. You can create a new screen from the dashboard through selecting 'add screen' within a collection overview, or from within an existing screen.

Simply press the right arrow in the bottom-right hand corner of your screen to enter a brand-new one.
✦⋮ **Tip:** You can also navigate between screens through a handy keyboard shortcut: CNTR + ENTER.

Fridge magnet

Go crazy with our fun fridge magnets poetry kit!

Say it!

Enhance communication skills, creativity, and imaginative thinking.

Classic whiteboard

A simple backdrop for your creativity.

Exit ticket

Gather information at the end of a lesson to prepare for the next one

Let's play Boggle!

Uncover as many words as possible in the time limit.

Sort the dominos

Check the students' mood before starting your class.

Emoji story generator

Create a new story every time with this handy emoji story generator.

Explore our Library

The Classroomscreen template library offers over 50 templates across diverse categories like classroom management, back-to-school, and language arts. These templates are designed to be both practical and adaptable, catering to various age ranges and skill levels.

Whether you're preparing for a new school year or looking to enrich your arts curriculum, these templates provide a great starting point. Best of all, they're **completely free for every teacher**, ensuring that anyone can benefit from these resources without any cost.

For a quick setup or a boost of inspiration, the template library's ready-made screens are a perfect go-to. These screens are **fully customizable**, allowing you to tweak them to fit your classroom's specific needs and use them repeatedly with ease.

Whether you have a Pro or Basic account, you'll find it easy to integrate these templates into your teaching routine, enhancing your classroom environment with minimal effort.

> ✦ **Example:** We have classic games like Hangman, Chess and Boggle for you to play with your class.
