Classroomscreen

What is Classroomscreen?

Hi! We're so glad you're here — welcome to Classroomscreen! Our platform offers a range of easy-to-use tools like timers, random name pickers, and a noise level monitor that you can display on a digital screen to enhance teaching and learning.

We call these tools widgets, and there are now 25 available to support your classroom routines.

You can mix and match widgets to:
- set clear expectations
- collect feedback
- support your time management
- include external resources and much more!

Classroomscreen is designed to make teaching more effective and engaging with just a few clicks. Use visual timers to keep lessons flowing, and monitor volume levels to create a calm learning space.

Clearly show instructions using the text box, encourage interaction with drawing tools and media, and get every student involved with randomizers and polls. You can also personalize your screen with custom backgrounds and themes to suit your class.

Let's get you signed up...

Whilst you can always use Classroomscreen without signing up, there are so many reasons why you should! Just enter your email, set a password, and you are good to go.

> ✦ **Tip:** You can login with your Microsoft or Google credentials to save time.

We do offer a **Pro** subscription with a bunch of additional features including saving and organizing your screens, and explore more advanced functionalities. This Pro subscription also allows you to organize your screens into workspaces, so you can keep all your resources where you need them most.

If you are looking to purchase multiple licenses, make sure to check out our **Organization** option. This allows for an admin to assign a set number of licenses to teachers in the same school or district, saving you both time and money! Reach out to us for a quote.

> ✦ **Example:** Our Pro subscription allows us to not only keep Classroomscreen entirely ad-free, but also gives us the time to keep developing the app into the future!

Basic
Recommended for getting started

$0⁰⁰ per year

Free includes:

- ✓ All 25 widgets
- ✓ Annotation bar
- ✓ Remote poll voting
- ✓ Save three name lists
- ✓ Save your own widget bar layout
- ✓ Complete access to our template library

Pro
Recommended for daily use

$36⁰⁰ per year

All Free features, and:

- ✓ Save and share your screens
- ✓ Organize your screens in workspaces
- ✓ Save custom backgrounds
- ✓ Save up to 100 name lists
- ✓ Create custom widget themes
- ✓ Access to all Pro backgrounds
- ✓ Create custom background carousels

I believe everyone should sign up for the pro account because of the convenience and peace of mind. I can put time and effort into my screens and then, since it is all saved, it is so easy to tweak them for the week and access them on different computers.

Meet the widgets

Classroomscreen consists of widgets, or tools, that you can add to a personal screen. We now have 25 widgets; from timers to polls, stickers to QR codes, we have everything a teacher needs in their class management toolkit.

background	poll	randomizer	sound level	image	text	work sym...	traffic light	timetable	timer	clock	scoreboard	stickers

group maker	video	dice	webcam	visual timer	calendar	event cou...	stopwatch	draw	embed	hyperlink	qr code

What does each one do?

Want to embed a Canva presentation? Roll a virtual die? Ask the class a question on their devices? We've got widgets for that!

Each one has their own specific features that can be helpful in a classroom, so we've made a detailed guide for each one to talk you through some of the possibilities.

Head to our Meet the widgets section of our website to find out more about what our widgets can do for your teaching!

✦ **Note:**   All our widgets are free to use, no matter whether you are a Pro or Basic user.

Dice

Your essentials

There are some widgets which we think are essential Classroomscreen tools, so we wanted to take this time to show them off to you in all their glory!

Clock

Where would any teacher be without a clock? You'll see this widget on pretty much every screen made by our users. Time management an essential part of teaching, so make sure to pop this on your screen to help keep track of the time.

✦ **Tip:** Want to change from analogue to digital? Just shrink the widget using your cursor until it changes!

Timer

The Timer widget on Classroomscreen helps you manage time with ease. Set countdowns in just a few clicks and choose from digital or visual styles to match your students' needs. Use multiple timers to support smooth transitions, activities, or group work.
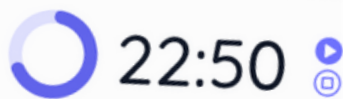

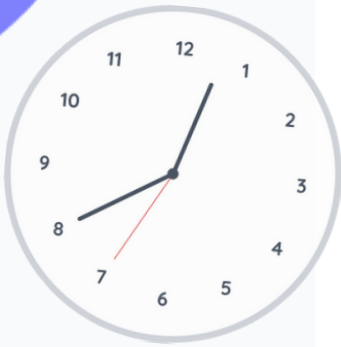

Backgrounds

Crisp, clear background images and patterns are a key benefit of Classroomscreen. Just click the background icon and select a picture, gradient or cute illustration to complete your screen.

You can also add your own image or even build a slideshow!

Poll

Whether you are measuring student understanding, gathering opinions, or fostering interactive discussions, this free live polling tool empowers you to collect real-time responses. We have three different formats and even live, remote voting included for all users.

✦ **Example:** Add a poll widget to your screen, select the True/False format and type in the question 'Sharks are mammals". Your students can vote from their devices!

Our community

We are so grateful for our global community of teachers, librarians and counsellors. If you are curious about how you can use Classroomscreen in your classroom, simply search #classroomscreen on any social media platform and you will find plenty of inspiring educators just like you using it in their classrooms.

Organizations

Say hi to your Dashboard!

Good organization is central to teaching, so when designing Classroomscreen, we prioritized storage! There is no limit on how many screens you can have as a Pro user, so knowing how to organize your screens effectively is super important.

Your Dashboard is where you can see all your screens and organize them according to your needs. You can access your dashboard by clicking on the 'Home' icon in the upper left-hand corner of your screen. You can also access your name lists, backgrounds and other important settings here.

Let's explain each tab

Home: This is where you can see all of your screens, sorted into workspaces and collections (we'll dive into those on the next page).

Name lists: This is where all your class lists are stored, to be used in the Group maker and Randomizer widgets. Basic users can store up to 3 name lists, while Pro users can store up to 100.

Backgrounds: If you are a Pro user, you will see all the background images you have uploaded to Classroomscreen. You can upload up to 800 images, so this tab is handy if you need to clear them out occasionally.

Settings: Access your display settings here, such as your language and time format preferences.

Template library: Not sure where to start? Head to our Library of free ready-made screens to get started.
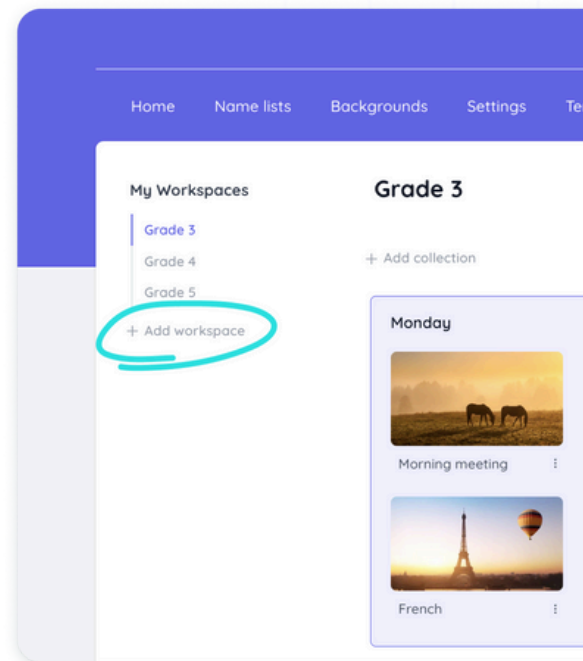

Workspaces

Dashboard > **workspaces** > collections > screens

You will see at least one workspace on the left side of the dashboard when using Classroomscreen with no account or a Basic account. If you have a Pro account, you can create additional workspaces.

> ✦ **Tip:** Workspaces are often used to group screens according to subject or year group.
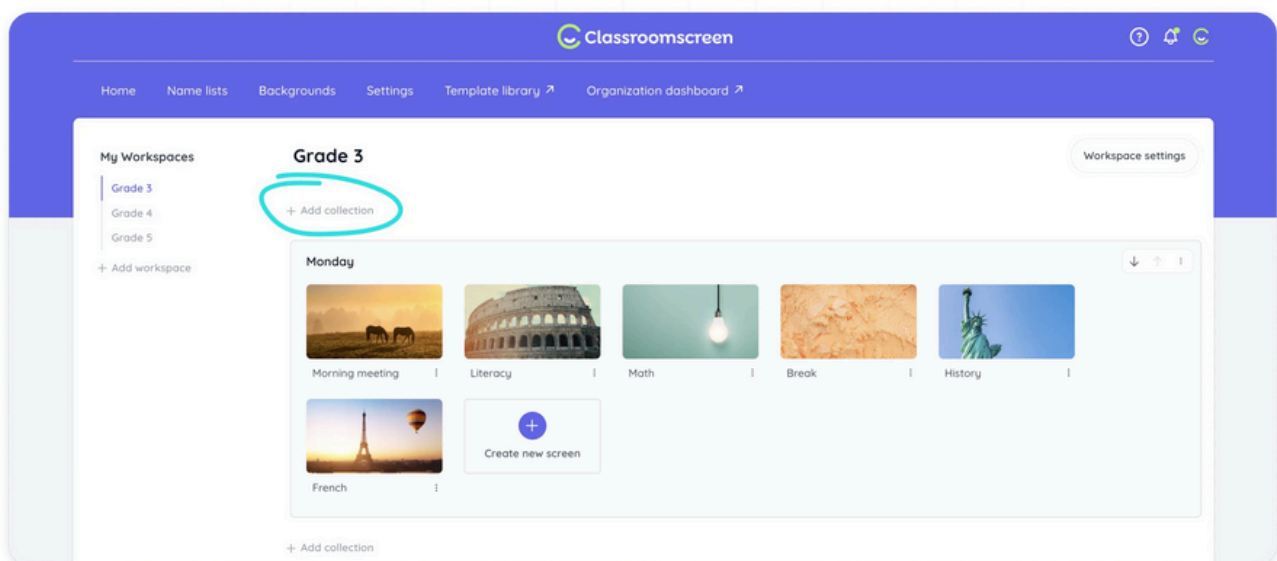

Collections

Dashboard > workspaces > **collections** > screens

Collections are a series of screens that can be flicked through. Also, if you choose to 'Pin' a widget, it will be visible in the same location on all screens within that collection.

There are many ways to use the collection, but a common way is to create one collection for each day and store all your screens for that day in the collection. You can also give each collection a different color to help your organization, and move screens between collections by just dragging your mouse.
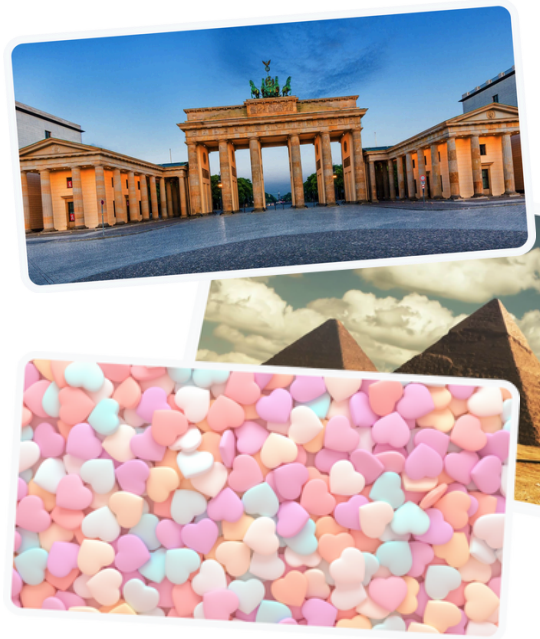

Screens

Screens form the basis of Classroomscreen - the clue is in the name! This is what you will be using in Classroomscreen to display all the tools that you need to keep your class on task.

Your screens can be customized with different backgrounds, widget themes and stickers to suit your teaching style.
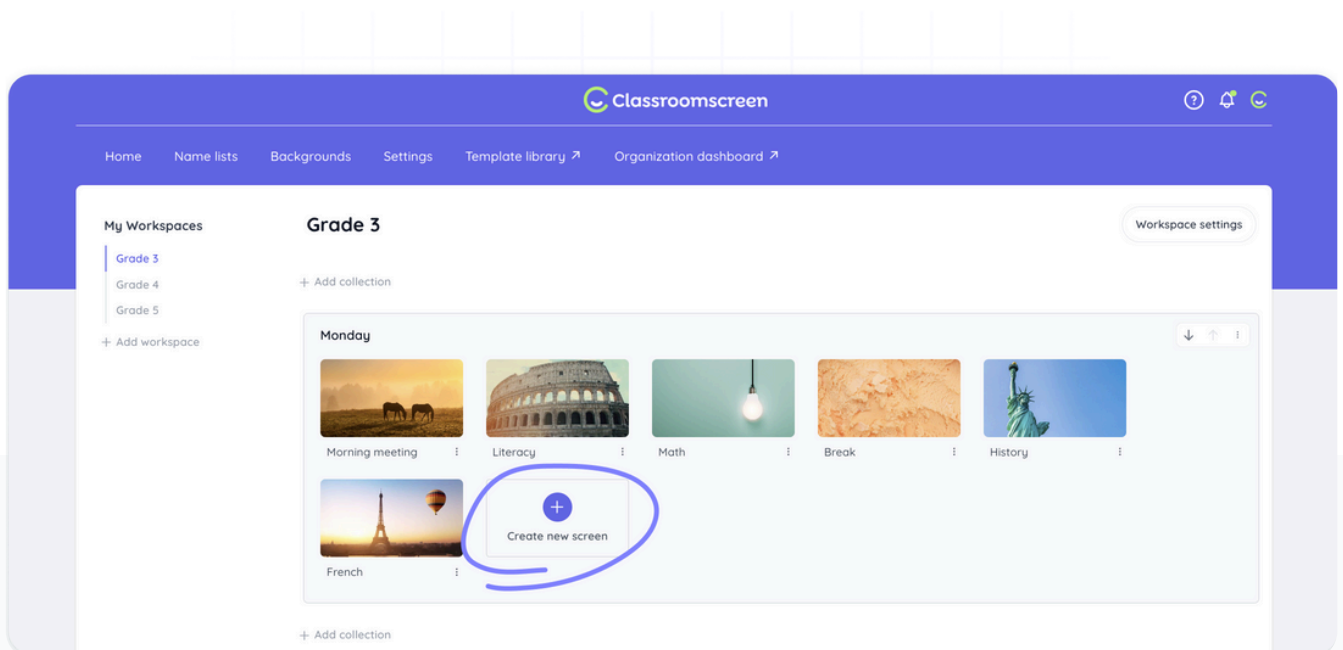

> ✦ **Note:** While everyone can use Classroomscreen for free, saving your screens is a Pro feature.

Add new screens

There are two ways to create a new screen:

- You can create a new screen from the dashboard through selecting 'add screen' within a collection overview, or from within an existing screen.
- Simply press the right arrow in the bottom-right hand corner of your screen to enter a brand-new one.
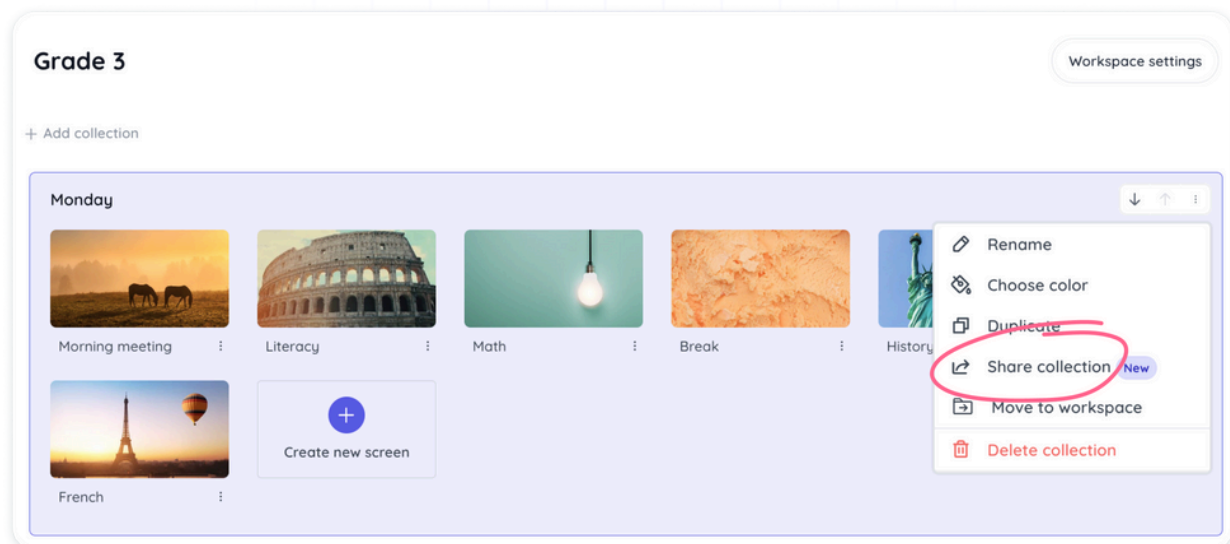

Sharing collections

With sharing, you can ensure that students, teachers, and administrators have access to your work when they need it. You can access sharing from different locations in your account, choose what information you wish to share, and modify or disable the permissions of the collections that you've shared.

From the Dashboard

In your dashboard, the sharing feature will be accessible within each collection. Click on the three dots on the top-right corner of a collection and click on 'Share collection' to create your link.

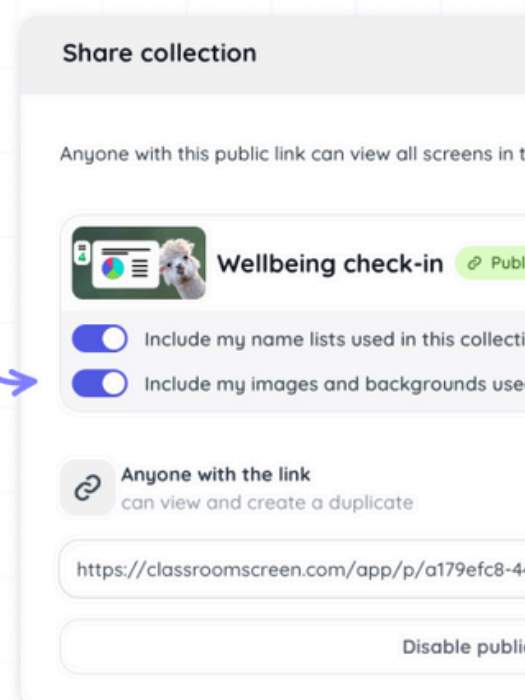

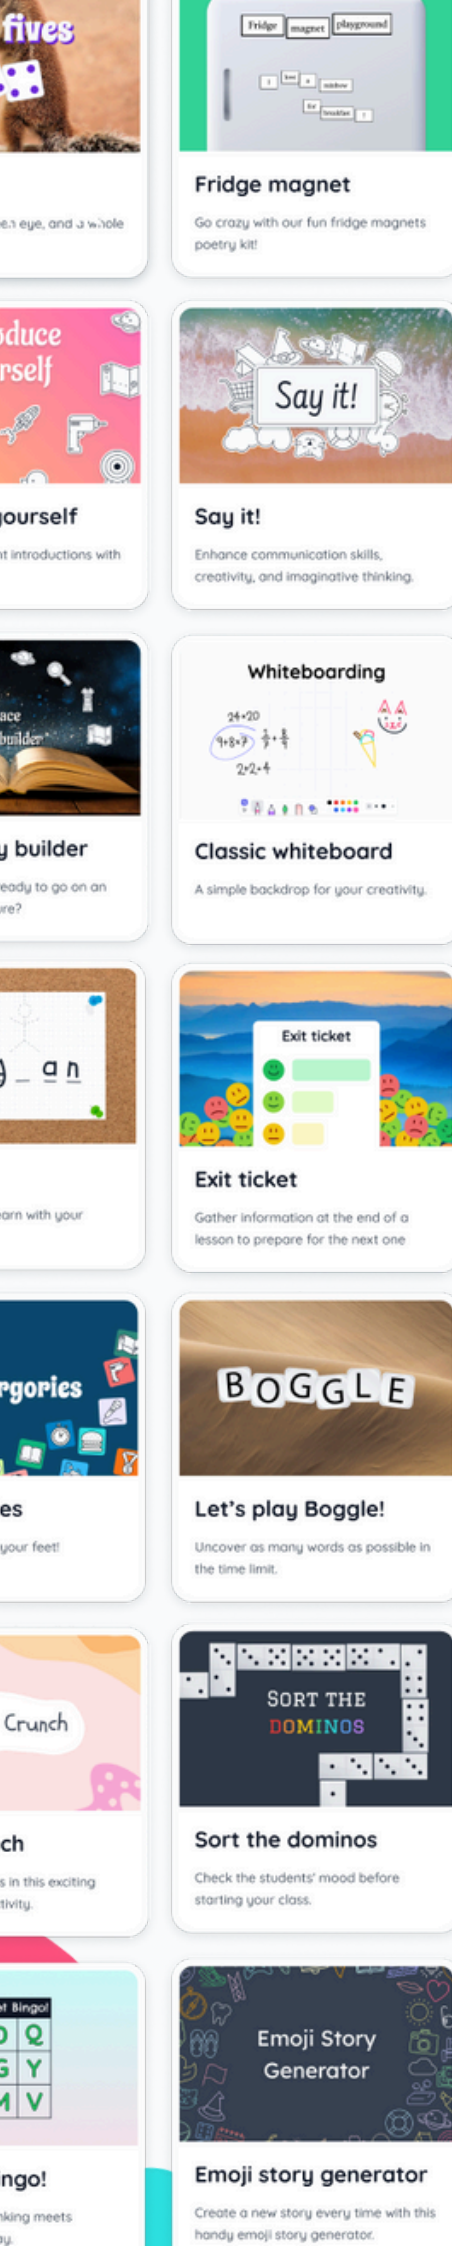

From within a screen

In your current screen, the sharing feature will be accessible for that specific collection. Click on the three dots on the top-right corner of a screen and click on 'Share collection' to create your link.

A pop-up will appear where you can select various settings such as whether to include name lists and images and whether they can make a copy of your screen.

Manage your privacy settings

Explore our Library

The Classroomscreen template library offers over 150 templates across diverse categories like classroom management, back-to-school, and language arts. These templates are designed to be both practical and adaptable, catering to various age ranges and skill levels.

Whether you're preparing for a new school year or looking to enrich your arts curriculum, these templates provide a great starting point. Best of all, they're **completely free for every teacher**, ensuring that anyone can benefit from these resources without any cost.

For a quick setup or a boost of inspiration, the template library's ready-made screens are a perfect go-to. These screens are **fully customizable**, allowing you to tweak them to fit your classroom's specific needs and use them repeatedly with ease.

Whether you have a Pro or Basic account, you'll find it easy to integrate these templates into your teaching routine, enhancing your classroom environment with minimal effort.

> ✦ **Example:** We have classic games like Hangman, Chess and Boggle for you to play with your class.
